Copper Forging Forged Parts Copper Forged Fittings

Copper Forging Forged parts Copper Forged Fittings

COPPER FORGINGS COPPER FORGED FITTINGS FORGED COMPONENTS AND PARTS CNC MACHINED COPPER PARTS

Conex is a leading manufacturer and supplier of metal forgings forged fittings and forged components from India. We offer Forgings products in a number of materials including Copper Brass Bronze and stainless steel as well as non ferrous Copper alloys. Copper forgings are often used in the electrical industry , building industry as well as in marine applications due to their corrosion resistant and biostatic nature. Forgings are helpful where due to uneven shape the part cannot be turned or CNC machined evenly.

Copper that undergoes cold forging and hot forging becomes extremely dense with a refined grain structure which allows forged copper products to reach very close dimensional tolerances. Additionally, the ductility of copper allows its forgings to reach a tight standard of uniformity during production of mass parts and components. This ductility also allows copper forgings to be hammered into smaller, thinner sections which resist cracking or developing flaws that lead to leakage. Copper forgings Copper stamping hot pressing are often alloyed with other elements and achieve desirable characteristics including high impact and tensile strengths as well as resistance to corrosion or abrasion. The wide range of benefits associated with copper alloy stamping and forgings allows the product to be a cost-effective alternative to many other metals.

- We have in-house tool room and can offer competitive price for tool-making and prototype making.
- Copper forging hot stamping hot forging up to 5 kgs in each size
- Brass Forging bronze Aluminium forging Stainless Steel forgings Also offered
- CDA Copper alloys used: 101, 110, 145 377, 385 377, 385 636, 642, 675
- CNC machined Copper forgings and precision swiss machining service available

ADDESS:
CONEX STAINLESS STEEL FITTINGS
