### STAINLESS STEEL STAMPED PARTS STAINLESS STEEL STAMPED COMPONENTS 304 316 STAINLESS STEEL PRESED STAMPED PARTS

Conex Stainless Steel is a manufacturer and supplier of all types of Stainless Steel stamped parts Stamped components pressed parts and stampings on high speed presses. We offer Stainless Steel pressed and stamped parts Stainless Steel deep drawn parts from various Stainless Steel grades like:

#### 300 Series Stainless Steel    400 Series Stainless Steel

- |                  |                  |
|------------------|------------------|
| • S304 stainless | • S410 stainless |
| • S305 stainless | • S430 stainless |
| • S310 stainless | • S434 stainless |
| • S316 stainless | • S436 stainless |
|                  | • S439 stainless |

### STAINLESS STEEL STAMPED PARTS AND STAMPED COMPONENTS STAMPINGS CHARACTERISTICS

Stainless steel is usually chosen for pressing and stamping deep drawn stampings when a part has high wear and tear , exposure to elements, heat, and certain corrosives. Stainless steel stampings and stamped parts pressed components are strong and durable.

Stainless steel deep drawn stampings are commonly used in the automotive industry for fuel delivery parts, braking components, oxygen sensors, exhaust components, decorative parts like lug nut covers, and many, many more.

Stainless steel stampings have the following desirable characteristics:

- Stainless steel is very strong, with a high strength to weight ratio
- Stainless steel is corrosion resistant
- Stainless steel is normally thought of as being non-magnetic but there are grades that are magnetic (offering electrical benefits)
- Stainless steel is heat treatable
- Stainless steel has very good wear resistance
- There is no need for plating with stainless steel
- Stainless steel can be polished in many ways for decorative purposes
